

FUTURE JOB ROLES

PRODUCTION

ADVANCED MANUFACTURING PRESS LINE SET-UP

An Advanced Manufacturing Press Line Set-Up Technician is able to write programs in the language of a machine's controller that determine the sequence of machine operations. They can fix Press Line problems by reprogramming the sequence of actions that are performed by machines and are able to perform preventative maintenance.

An Advanced Manufacturing Press Line Set-Up Technician develops programs to control Press Lines, which are used for metal processing.

Press Lines are essential machines on the process of making the body and the chassis of a vehicle.
There is a clear need to develop a job role that keep press lines fit and working.
