

FUTURE JOB ROLES

ENGINEERING AND RESEARCH & DEVELOPMENT

PRACTITIONER IN AUTOMOTIVE SPICE®

Nowadays, electronics and software control already about 90% of a modern car's functions. With the increasing complexity of software and systems in car, the car manufacturers started in 2005 to evaluate their suppliers software process capability according to the process assessment model Automotive SPICE®.

The majority of Tier-1 companies developing mechatronic systems have aligned their processes according to the V-Model and the requirements from Automotive SPICE®.

The Practitioner in Automotive SPICE® understands the process reference model and measurement framework of Automotive SPICE® and knows how assessments are performed and how to interpret and to understand the requirements from Automotive SPICE® for their projects.
